EXPERIENCE

FULL STACK(MERN) DEVELOPER @iih, global Apr., 2024 - Till now

- Developed custom domain and Single Sign-On (SSO) login systems using Node.js and EJS.
- Implemented multi-domain login functionality with Logto, enhancing user authentication across multiple platforms.

FRONTEND DEVELOPER @ zyapaar   Sep., 2022 - Apr., 2024

- Designed and developed a chat app using Socket.io for a B2B application, resulting in a 40% increase in daily active users and 25% higher user engagement levels.
- Set up the entire project in Next.js, including implementing internationalization features.
- Collaborated with a team to complete that project in 3-4 months.
- Hosted that application on AWS using Nginx and Docker with collaboration of Devops.
- Developed an upload catalogue feature using data extraction from Excel sheets, streamlining product addition and management.
- Built an admin panel using React to provide efficient content management and control.
